- ☐ Turkish
- ☐ English

ABOUT ME

- During my studies at Karadeniz Technical University in the Software Engineering Department, I developed projects in various programming languages in my spare time and gained successful internship experiences at different companies. With a goal of continuous learning and self-improvement, I aim to work in a company where I can utilize my skills as part of a team.

PROJECTS

- CLUB MANAGEMENT AND INTERACTION PLATFORM**
Club Management and Engagement Platform I developed this project to facilitate student interaction with the club. The platform offers various features for both club members and students interested in learning more about the club:
 - Club Information:** Members and interested individuals can access detailed information about the club.
 - Event Management & QR Code System:** Events are announced, and participation is simplified through a QR code system.
 - Club Management Panel:** A dedicated panel for club administrators to manage events, members, and announcements.
 - Blog & Announcement System:** The club can share updates and content in a blog format.
 - Sponsor Support System:** Sponsors can be showcased on the platform, offering students discounts or benefits via QR codes.This project aims to digitalize student clubs, enhance engagement, and streamline management processes.

EDUCATION

- SOME COLLEGE (NO DEGREE) | 2026**
KARADENİZ TEKNİK UNIVERSİTESİ, TRABZON
 - Developed effective object-oriented programming skills using C++
 - Ability to ensure high-level quality in site design using PHP
 - Experience in creating user-friendly and impressive mobile applications via Android Studio
